Water/Wastewater Committee Meeting
April 20 2021
immediately following Code Enforcement Committee Meeting

1. Call to Order
2. Public Comment
3. Water/Waste Water report
 - Generator project update-- The generator project is completely finished, and all generators are operating properly
 - Oxidation ditch project update—The first onsite construction meeting for the oxidation ditch project will be this Thursday April 22nd with Helm Mechanical, Robinson Engineering, Dustin, and myself.
 - The rehab of the chlorine disinfection building is about 95% complete. We are only waiting on a few small items to be completed.
 - We are in the process of working with a contractor for the brick and masonry work at Well 6 and Mulberry lift station.
 - I have two quotes that I would like to get approved the first is for upgrading the lift station at Doug's Overhead door. One of the pumps was completely inoperable and the other pump is not far behind. The panel was hit by lightning at some point in the past. The control panel was damaged. I have attached a quote from FJF Services for two new 5hp pumps and a new control panel.
 - The second quote I have is for the SCADA system upgrade at the wastewater plant, and the integration of the Metro cloud at the wastewater plant. This will put the wastewater plant on the same program as the new lift station, Mulberry lift station, and the wells. The quote is from Metropolitan pump. The metro cloud is proprietary therefore we are not pursuing other quotes.
 - Miscellaneous Items
4. Work Report
5. Other
 - a) Committee Members Inquires
6. Adjourn
